

SOREX Door Phone & Code

Quick starting guide

How to set a new code for the numerical keyboard

1. Start the programming mode

To start the programming mode, type in the Tür-PIN consisting of 6 digits on the numerical keyboard and confirm with OK.

Please note: Before continuing with the next steps, wait until you hear a high beeping-sound and the blue LEDs stop blinking.

2. Enter your personal numerical code

Your numerical code can consist of 4 to 10 digits.

3. Confirm with OK.

How to connect a new mobile phone

1. Switch on the Bluetooth function of your mobile phone.

2. Start the programming mode

To start the programming mode, type in the Tür-PIN consisting of 6 digits and confirm with OK.

Please note: Before continuing with the next steps, wait until you hear a high beeping-sound and the blue LEDs stop blinking.

3. Search for “SOREX Door Phone and Code” in your Bluetooth settings and select it.

Please note: If your mobile phone is already paired with the device, please terminate the connection.

4. Pair your mobile phone with “SOREX Door Phone and Code”.

5. Enter the 6-digit numerical code on your mobile phone and confirm with OK.

Please note: Especially on iOS devices it may happen that an error notification will appear, even though the pairing was successful. This alert may be ignored. (See figure on the right)

This alert may be ignored!
