

SOREX Door Phone & Code

Keyless access via mobile phone or entry code, access management through app

The SOREX Door Phone & Code access system enables you to open a door or gate with any Bluetooth-compatible mobile phone or a numerical code. The lock identifies authorized mobile phones within a set detection range and sends an impulse to open the locked door – you do not even have to take your mobile out of your pocket. The product can either be mounted directly into the door leaf or onto the wall. An administration application enables users to configure the system, change codes, block or delete user accesses, modify operational ranges etc. Up to six doors can be managed simultaneously. The 20 most recent entrances are recorded.

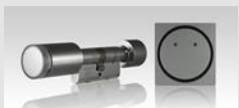

Article-No.	Product Name	Short Description
DO401000 black, silver	SOREX Door Phone & Code GLAS	Electronic access system with touch-screen interface; ideal for households; enables access via Bluetooth-compatible mobile phone or a numerical code; administration via smart phone app
