

SOREX Bluetooth door handle (with pin code)

Smart door handle with easy installation & access control

The SOREX Bluetooth door handle (with pin code) enables easy access via App on your smartphone or via pin code-input at the handle. The pin codes and shares can be managed by your mobile phone. An additional feature of the app is the access protocol, where you can see which users opened the door recently or which pin codes were used. Thanks to the easy installation and intuitive interface of the app the handle is also ideal to upgrade doors in office environments.
